## MOTIVATION

---

I am interested in accelerating the development of materials for sustainable energy through a combination of experimental and computational techniques. I particularly enjoy working on electrochemical characterization and modeling tools for various energy storage and conversion devices.

## EDUCATION

---

**University of Washington, Seattle**  
*MS in Materials Science and Engineering*  
Advisor: Prof. Guozhong Cao

*2022 - present*  
GPA: 3.88/4.0

**National Institute of Technology Karnataka (NITK), Surathkal, India**  
*B.Tech in Metallurgical and Materials Engineering*  
Advisor: Prof. K Narayan Prabhu

*2017 - 2021*  
GPA: 8.08/10

Theses: Characterization of Paraffin Wax for Microelectronics and Thermal Energy Storage Applications.

## RELEVANT EXPERIENCE

---

**Electric Hydrogen, Greater Boston**  
*Cell Development Co-op*

*June 2023 - present*

- Studying two-phase flow in electrolyser through electrochemical testing and high-speed imaging.
- Developing models using open source platforms (OpenCV and Image J) to perform large scale image analysis.

**Sol-gel Research Group, University of Washington, Seattle**  
*Graduate Student Researcher*

*September 2022 - present*

- Examining the effect of temperature on LIB performance for freight trucks.
- Developing data-driven machine learning models to forecast life-cycle of LIBs.

**Remote Research Collaboration**

*April 2020 - present*

*Funding: Department of Science and Technology under India-Korea bilateral project & NRF-Korea*  
Advisors: Dr. Nitin K Chaudhari & Prof. Kwangyeol Lee

- Collaborated with researchers from Pandit Deendayal Energy University, Korea University and the University of British-Columbia in interdisciplinary project grants.
- Evaluated and published articles on the performance metrics of MXene materials and their heterostructures for energy storage and neuromorphic computing applications.

**Prabhu Research Lab, NITK**  
*Undergraduate Student Researcher*

*August 2020 - April 2021*

- Estimated latent heat of CNTs embeded paraffin wax and through inverse heat problem and Newtonian calculations.
- Performed charaterization of paraffin wax for microelectronics and thermal energy storage applications.

**Log9 Materials**

*November 2021 - June 2022*

*Chief of Climate Action and Materials & Electrochemistry Intern*

- Identified the degradation mechanism in 3V and 2.7V super-capacitors using a three-electrode split cell system.
- Achieved benchmark performance in 2.7V 18650 and coin cells super-capacitors by investigating different electrolytes.
- Developed the one-pot synthesis process to prepare an aqueous lithium-titanate anode slurry for LIBs.
- Analyzed, interpreted & presented the cyler data of LIBs and super-capacitors in weekly team meetings.

**Defence Institute of Advanced Technology, DRDO,  
Ministry of Defence, Government of India**  
*Summer Research Intern*  
Advisor: Prof. Balasubramanian K

*May - July 2019*

- Reviewed & published article on developments in MXene materials for energy applications.
- Assisted PhD students in drafting & editing articles on polymers for electronics & super-capacitor applications.
- Acquired laboratory skills & working principles of characterization tools such as viscometer, UV/VIS spectrometer, electro-spinning setup, single and twin-screw extruder, probe sonicator, contact angle goniometer and melt flow indexer.

## RESPONSIBILITIES

---

- *Graduate Chemistry Tutor - STARS program, University of Washington* *February 2023 - present*
  - Taught Chemistry 142 and Chemistry 152 for ~ 30 students.
  - Mentored highly motivated Washington state residents from low-income backgrounds & under-deserved high schools to graduate with degrees in engineering and computer science.
- *Vice-Captain Operations & Brake Systems Head - Baja NITK Racing, Baja SAE India, NITK* *2018 - 2021*
  - Administered and designed the braking system of an all-terrain vehicle per the Baja SAE rulebook
  - Strengthened the operational strategies by forecasting budget and secured INR 3.5 lakhs funding
  - Secured 1st place in marketing presentation out of 80+ teams at Baja SAE India 2018, IIT Ropar
  - Ranked 11th in overall static events and 4th in cost report out of 150+ teams in Baja SAE India 2021
  - Ranked 1st in B-plan and overall 2nd in the ATVC virtual championship 2021

- *Class Representative, Metallurgical and Materials Engineering, NITK Students Council* 2019 - 2021
  - Spearheaded a class of 50 students at different levels of the student body and competitions
  - Proposed and implemented a revised course plan to improve cohesive learning and teaching methods
- *Joint Convener, Incident 2019 NITK* 2018 - 2019
  - Organized student participation and managed logistics for the five-day annual cultural festival ~ 8,000 attendees

## COURSEWORK ---

- Imaging at nanoscale and atomic scale, nanostructures and nanomaterials (thin-films, chemical/physical vapor deposition, lithography, spectroscopy), defects in materials, electron theory of materials.

## TECHNICAL SKILLS ---

- *Engineering skills:* Non-destructive testing, MIG welding, Failure analysis & Metallographic examination.
- *Computer skills:* Python, OpenCV, ML Modeling, Vesta, Neware battery cyclers, BioLogic, Catia, MS Office, Origin pro & C.
